FILE COUNTS

different: 2
equal: 2
left: 6
onlyLeft: 2
onlyRight: 2
right: 6

AUTHORIZED COVERAGE

Full authorized inventory; technical diff availability is recorded per file.

TECHNICAL LIMITS

Ordinary DEV bytes only; no provenance or security certification. 8 MiB input; 32 MiB expanded; 1000 members; 512 KiB text; 2000 lines; 4096 characters per line. Unsupported text has explicit reasons.

PUBLIC SYNTHETIC DATASET

authorization: Synthetic content authored for the Purlivo public DEV example under the user mandate; contains no customer data.
classification: SYNTHETIC_PUBLIC_DEMO_DEV
datasetId: purlivo-synthetic-example
datasetVersion: 1.0.0
direction: left-to-right
leftName: example-1.0.zip
leftSha256: b8c9da0358f50f9f0cf2f763ab4dae60f92dde1a1aea1ba3b00f45efa0703580
limits.1: DEV ordinary byte comparison; no security, quality or historical provenance conclusion.
limits.2: UTF-8 and BOM UTF-16 supported within text budgets; binary and nested archives have no textual diff.
limits.3: 8 MiB uploads; 32 MiB expanded; 1000 members; 512 KiB/text; 2000 lines/text; 4096 characters/line; 4 MiB canonical result.
limits.4: Equal bytes at different paths is an overlapping relation, not a proven rename.
limits.5: Fixed public synthetic example. Private rights and seven-day access windows are unchanged.
origin: Deterministic repository generator deploy/generate_public_demo.py; generated by the ordinary Compare engine before deployment.

TEXT NOTATION

PDF uses literal escapes: backslash, CR, LF, TAB and non-ASCII UTF-16 code units. JSON/CSV retain original Unicode text.
